EDUCATION

Bachelor of Technology in Computer Science Engineering

2024 – 2028

Parul Institute of Engineering & Technology

CGPA: 8.83/10

Relevant Coursework: Data Structures & Algorithms, Object Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Web Development, Machine Learning Basics.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, SQL

Web: HTML5, CSS3, React, TypeScript

DSA & CP: Arrays, Trees, LinkedList, Stacks, Queues

Tools: Git, GitHub, VS Code, Linux

Libraries: NumPy, Pandas, Scikit-learn, Matplotlib

Familiar: Java, TypeScript

EXPERIENCE

Participant – Vadodara Hackathon 6.0

2025

Hackathon Event

- Developed **EduShield**, a disaster preparedness awareness platform, under strict hackathon deadlines.
- Implemented Firebase backend for real-time data storage and user authentication.
- Designed fully responsive frontend ensuring accessibility across mobile and desktop devices.

TECHNICAL PROJECTS

Suspicious URL Detector – Security Web Application

[\[GitHub Link\]](#)

- Problem Statement:** Detecting phishing and malicious URLs in real-time using heuristic rule-based analysis.
- Major Impact:** Built a **Python + Flask** backend with structured logging, unit tests (**unittest**), and edge-case handling for invalid URLs and false positives.
- Outcome:** Delivered an open-source web app with clear documentation; demonstrates strong Python back-end development skills.

UrbanCart – Full-Stack E-Commerce Platform

- Problem Statement:** Building a scalable e-commerce application with real-time cart management and secure authentication.
- Major Impact:** Engineered full-stack app using **React**, **TypeScript**, and **Supabase** with real-time database operations for dynamic cart updates and order summaries.
- Outcome:** Delivered a responsive, type-safe application with consistent UI using Tailwind CSS across all screen sizes.

EduShield – Disaster Preparedness Awareness System

- Problem Statement:** Raising community awareness on disaster preparedness through an interactive digital platform.
- Major Impact:** Developed using **HTML**, **CSS**, **JavaScript** and **Firebase**; created interactive educational modules with emergency protocols and safety measures.
- Outcome:** Presented at Vadodara Hackathon 6.0; demonstrated ability to build and ship functional products under time constraints.

CONSISTENCY & ACHIEVEMENTS

- Competitive Programming:** Solved **300+** problems on LeetCode and GeeksforGeeks in **C++** and **Python** covering Arrays, Trees, LinkedList, Stacks, Queues, Recursion, and Hashing.
- Academic Excellence:** Achieved **8.95 SGPA** in BTech CSE (3rd Semester) – top performer at Parul Institute of Engineering & Technology.
- Technical Certifications:** IT Specialist – JavaScript – Pearson VUE ([View](#)), IT Specialist – HTML & CSS – Pearson VUE ([View](#)), Python Programming – IBM ([View](#)), Technology Job Simulation – Deloitte Australia (Forage).
